The ROC curves for all trees are optimal According to the results of my code Random Forest is slightly better than remaining models and I recommend random forest.

The trees all are optimal According to the results of my code, random forest trees are better than remaining models, and random forest has the lowest value also and I recommend random forest.

The decision trees are optimal because it is easy to understand. I recommend random forest because it's decision trees are very easy to understand and it's classifies everything clearly.
